

Quality™ Chasers for Landis Style Tap Heads

REGULAR

PROJECTION

ESSENTIALS:

Quality Chaser is one of the leading manufacturers of Landis style tap chasers. These precision ground tools are thread ground on state-of-the-art grinding machinery to exacting standards.

Since tap chaser geometry is unique to each specific application, it is not possible to offer standard part numbers. Once we have all of the details to properly engineer the tools, however, we will assign a customer-specific part number for future orders. This ensures optimum tool life and consistent results between sets.

Quality™ tap chasers are available for all Landis style tap heads in both regular and overhanging styles. They are available in standard and special thread forms such as UNS, ISO, NPT, NPS, API, BSPT, BSPP and Acme.

SPECIFICS:

For proper order entry, you will need the following:

1. Number of sets required
2. Material being threaded
3. Size and Style of Tap Head
4. Part Print (if available)

If no part print is available, you must also supply:

5. Diameter and Pitch of thread to be cut
6. Thread Form (UN, ACME, METRIC, PIPE, etc.)
7. Chaser Style (Regular, Projection, etc.)
8. Cutting Face Angle and Type
9. Chamfer Angle
